

A call to all Zimbabweans!

Nothing is more unworthy for civilized people than being 'ruled' without resistance by a government clique that is devoted to irresponsible and dark instincts. Isn't it true that nowadays every honest Zimbabwean is ashamed of their government? If everybody waits for the other one to make the first step, then also the last victim will be thrown senselessly into the throat of this insatiable demon. Therefore all people need to defend themselves in this final hour as much as they can, they need to work against the scourge for mankind, against the dictatorship and every similar system of an absolutist state. Offer resistance - resist -, wherever you are. Don't forget that all people deserve the kind of government that they tolerate. If a wave of uproar sweeps through the land, if 'there is something in the wind', if many participate, then this system can be shaken off with a tremendous effort.

It is not too late yet to clear up this most horrible monster of a government for good, in order to not incur even more guilt. Now that our eyes have been opened completely, now that we know who we are dealing with, now it is high time to exterminate this horde. Now that the tyranny has been recognized, it must be the only and highest duty of every Russian to devour these beasts. Our current 'state' is the dictatorship of evil. It is not only your right but your moral duty to eradicate this system. If a human being doesn't have the strength to claim his right, then he must absolutely and necessarily go down.

Don't hide your cowardice under the guise of cleverness. Because with every day that you continue to hesitate, that you don't resist this creature from hell, your guilt will increase. Many, maybe most of the readers of these handouts, aren't aware of how they can offer resistance. We want to try to show them that each and everyone is able to contribute to the fall of the dictatorship. Not by individualistic rivalry, but by the cooperation of many convinced, energetic people who agree on with which means they can achieve their goal.

The meaning and the goal of the resistance is to bring down the dictatorship, and in this battle we mustn't shy away from

any way and any act. The dictatorship must be attacked at all possible vulnerable points. This mutated, deformed caricature of a state must as soon as possible be brought to an end. How can we fight against the current 'state' in the most effective way, how can we give it the most painful blows?

Every word that comes out of the dictator's mouth is a lie. His mouth is the stinky throat of hell and his power is fundamentally unrighteous. The battle against the totalitarian terror state must surely be fought with rational means; but those who even now are in doubt about the real existence of those demonic forces did by far not understand the metaphysical background of the battle. We must attack the evil right there where it is the most powerful, and it is the most powerful in the power of the tyrant.

But what do the Zimbabwean people do? They don't see and they don't hear. Prove by your acts that you think differently! The better part of the nation is fighting on our side. Tear up the coat of indifference that you have wrapped around your heart! Every centralist force must be nipped in the bud. Zimbabwe can only be federalist. Freedom of speech, freedom of religious beliefs, the protection of the individual citizen from the arbitrariness of criminal political systems, these are the foundations of a new world.

We only have one slogan: Fighting against the dictatorship! No threat can daunt us, not even the closure of our universities. The Zimbabwean name will be forever dishonoured if we don't finally stand up, take revenge, atone and smash the tormentors. The people of Zimbabwe watch us! They expect us to break the dictatorship by the power of the mind.

Support the resistance movement, spread the handouts!
